## **DETAILED ACTION**

### ***Reasons For Allowance***

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a liquid crystal display device comprising: a liquid crystal display panel having signal lines and scanning lines; a data driver which drives the signal lines; a gate driver which drives the scanning lines; and a timing controller controlling a display timing of image data to be displayed on the liquid crystal display panel, the timing controller comprising: a data enable signal detection circuit which detects a data enable signal applied to the timing controller. The closest prior art of Yamaguchi (US 6,329,975) shows a similar invention, however, he fails to teach a timing generating circuit which controls the display timing on the basis of the data enable signal detected by the data enable signal detection circuit, said start timing of display being independent of horizontal and vertical synchronizing signals externally supplied, said liquid crystal display device having only a display timing control mode in which the display timing is responsive to the data enable signal, without having another display timing control mode in which the display timing is independent of the data enable signal as claim 7.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
